

Tailor-made solutions for biocatalytic applications

Purpose of Enzymicals AG:

- ♦ Development of resource efficient, sustainable and cost effective procedures for the chemical and pharmaceutical industry

Enzymicals AG offers:

- ♦ Identification, manufacturing and application of innovative biocatalysts
- ♦ Development of tailor-made bio-processes for compounds of your demand
- ♦ Optimisation of reaction pathways and development of new synthetic routes
- ♦ Production of fine and special chemicals

Special features of Enzymicals AG:

- ♦ Unique feature in patented recombinant pig liver esterases
- ♦ A wide spectrum of (R)- and (S)-selective amine transaminases, Baeyer-Villiger monooxygenases and hydrolases
- ♦ In-house-projects also with additional enzyme classes e.g. with new halohydrin dehalogenases and imin reductases
